# Sadler. Step into freedom

Designed specifically for people with limited flexibility, the Sadler is a totally new concept in stairlift design. It offers a new alternative to traditional and perch-style stairlifts, helping you maintain a more upright posture at the same time as taking much of your weight through the seat, minimising the weight supported by your legs. The slim design is great for homes where the staircase is too narrow to accommodate a traditional stairlift.

## Key features

### 1. Arm-to-footrest link

You can fold away the downside arm and the footrest will fold automatically when you are not using your stairlift. There's no awkward bending down, which is particularly useful at the top of the stairs.

### 2. Easy-to-use controls

Intuitive arm control makes operating the Sadler effortless.

### 3. Saddle-style seat

The unique saddle style seat enables you to maintain a more upright posture and minimises the weight supported by your legs. The assisted seat feature offers easy entry and exit from the chair. The seat height can be adjusted on installation to fit you.

### 4. Easy-to-use seatbelt

Use the specifically designed seatbelt which can be fastened simply and easily with one hand. The stairlift will not operate unless the seatbelt is securely fastened.

### 5. Safety

Safety sensors around the footrest and carriage automatically detect any obstruction on your stairs, bringing your Sadler to a safe and gentle stop.

The stairlift will not operate unless the downside arm is lowered.

## Sadler Curved Rail Colours

Beige

# Sadler. Your step-by-step guide

We believe a stairlift should go beyond the functional to become a seamless part of a more rewarding life. To us, that means making it beautifully simple to operate.

**1.** Your Sadler can be folded against the wall when it's not in use, giving you more space.

**2.** To unfold your Sadler, just lower the arms and the footrest unfolds too.

**3.** A gentle movement of the control is all it takes to make your Sadler glide effortlessly upstairs or downstairs.

**4.** When you arrive at the top of the stairs, the assisted seat feature offers a safe exit from the chair.

**5.** When not in use at the top of your stairs your Sadler can be left in the open position.

**6.** Using the wall-mounted remote control, you can send and receive your Sadler to either end of the stairs.

## Sadler. Created just for you

Our standard features ensure that your Sadler is tailored just for you.
